

## Targeted therapeutic approaches against degenerative diseases with emphasis on cancer and aging (STHENOS-b)

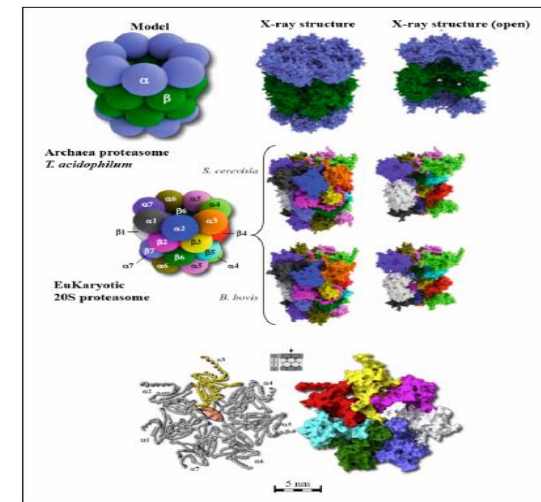

Design, Synthesis, Biological evaluation of new anti-cancer and anti-ageing compounds against GR, BRAFV600E, proteasome and mtp53

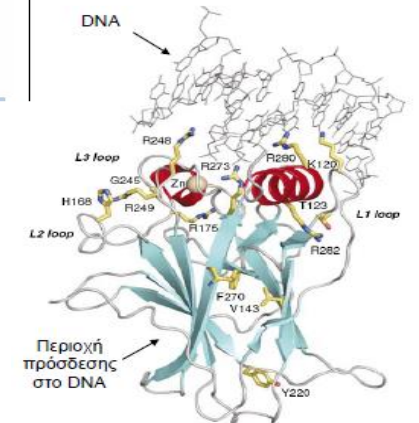

Complex : GR LDB  
With DAC DEX

Complex: BRAFV600E with  
Vemurafenib

Complex: Proteasome 20S

Complex: P53-DNA
